NCSF Assessment℠ – Powered by the CyberStrong Platform™

NIST Cybersecurity Framework (NCSF) Assessment Program
NISTCSF.COM assessment program provides organizations with the NCSF certification training and online assessment tools to quickly understand how its current cybersecurity profile aligns with the controls outlined in the NIST Cybersecurity Framework and other industry best practice frameworks (i.e., NIST 800-171, NIST 800-53 etc.). The NCSF-Assessment℠ provides an easy to understand score card and report that may be shared amongst IT teams, external stakeholders, as well as executive management to obtain the funding and resources to close the critical cybersecurity gaps identified during the assessment.

NIST Cybersecurity Framework (NCSF) Assessment Certification Training Programs

NCSF-CFM Foundation Certification Training – This four-hour self-paced video training program teaches the fundamentals of the NIST Cybersecurity Framework (NCSF) and the UMass Lowell Controls Factory™ Model, a methodology created by the former CISO in the UMass President's office to operationalize the NIST Cybersecurity Framework across an enterprise and its supply chain. The program is targeted at IT, Cybersecurity and Business professionals involved in performing an NCSF assessment along with those that need a basic understanding of the NIST Cybersecurity Framework to perform their IT, Cybersecurity or Business role within an organization.

The Cyberstrong NIST Cybersecurity Framework Assessment Platform™
This online NCSF assessment tool enables organization of any size to manage its cybersecurity posture as it would any other critical business function. NCSF-Assessment℠ streamlines the assessment process by creating an online, collaborative environment for the collection of an organizations cybersecurity

controls data to determine its current NCSF profile and to assign work responsibilities to realize its target profile. The NCSF-Assessment service will enable organizations to:

Empower Your Team to Complete Any Cybersecurity Best Practice Assessment
- Identify all the controls associated with a company's cybersecurity program
- Score your level of risk for each control against well-known industry best practice frameworks
- Score compliance for each control with a simple workflow that includes needed team members.
- Set due dates, view workflow status and assign control owners with collaborators.

Intelligently Close Compliance Gaps Using AI and a Powerful Reporting Engine
- Produce AI generated compliance roadmaps that weight associated cost and impact variables, to improve on your cybersecurity score.
- Allow management to determine Risk Tolerance as measured against the NIST Cybersecurity Framework, DFARS and other frameworks.
- Quickly establish a well-informed plan of action & mitigations (POAM) to guide continuous improvement.
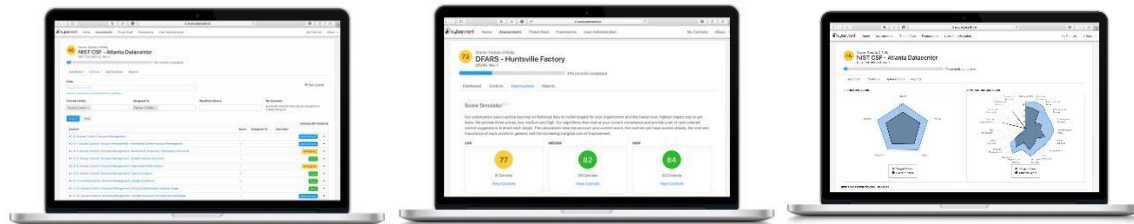

The result is a more efficient assessment process and automated executive reports that don't require an advanced degree in computer science to understand. All while increasing your cybersecurity resilience.

Pricing
1. **NCSF-CFM Foundation Certification Training with CyberStrong without NIST policies****
   $895 (30-day License)
2. **NCSF-CFM Foundation Certification Training with CyberStrong with NIST policies**
   $1,495 (30-day License)
3. **NCSF-CFM Practitioner Boot Camp Certification Training with CyberStrong without NIST policies**
   $1,795 (30-day License)
4. **NCSF-CFM Foundation Certification Training with CyberStrong with NIST policies**
   $2,395 (30-day License)
5. **Need a Mentor to guide you through the NCSF Assessment and Risk Treatment Plan?**
   $1,500 (8 hours) - $2,750 (10 Hours) - $5,000 (20 Hours)

*Extension licenses are available for both the certification programs and The CyberStrong Platform™

**The NIST Cybersecurity Framework (CSF) set of cybersecurity policies and standards are tailored for organizations that do not need have the experience or staff to create their own.
