

The CyberStrong Platform

Automated, Intelligent Cybersecurity Compliance and Risk Management

CyberStrong puts your cyber program on a solid foundation.

Cybersecurity can be costly, difficult and at times even chaotic. Many organizations do not have visibility into their cybersecurity posture. While big-box GRC products boast ease of use and time to value, most fall short of expectations. CyberStrong cuts through the complexity and uses a risk-centric lens to provide an unbeatable time-to-value, lower cost and higher productivity compliance and risk management solution. In the words of Gartner, “IRM goes beyond the traditional compliance-driven GRC technology solutions to provide actionable insights that are aligned with business strategies, not just regulatory mandates.”

CyberStrong simplifies cybersecurity program management.

Measurement and management must be combined to operationalize a proactive cybersecurity program. CyberStrong is the only solution to add unparalleled automation to compliance and risk projects, increasing visibility with executive dashboards and real-time risk and compliance analytics. The automated CyberStrong Score provides easy-to-understand measurement that communicates program success between IT teams, external stakeholders, as well as executive management and the Board.

CyberStrong is powered by people and breakthrough Artificial Intelligence (AI).

The CyberStrong Platform enables continuous “always on” integrated risk management, allowing your organization to manage cybersecurity as you would any other business function. CyberStrong’s patented AI-powered optimizations automate risk mitigation action planning for compliance and risk initiatives that identify remediation actions with the highest ROI. The result is a more efficient process as well as more informed decision making. Board-ready reports are available for instant download, bridging the gap between technical and non-technical executives.

The CyberStrong Platform Makes Managing Your Cyber Program Easy.

Compliance with a spreadsheet or legacy GRC tool is invalid the moment the assessment is complete.

Streamline integrated risk management with unmatched visibility, ease of use, and automation that transcends traditional bottlenecks that slow you down.

Determine Compliance At A Glance

View your compliance status for all assets, vendors, and locations against any framework or standard - NIST CSF, NIST 800-53, FEDRAMP, HIPAA, ISO 27001, IEC 62443, GDPR, NIST SP 800-171, custom controls, and more.

Deliver clear reports that show success, progress toward target compliance posture, that require zero manual effort to develop.

Multiple Assessments, No Duplicated Efforts

With CyberStrong's integrated approach, transfer control data between assessments to save time and reduce redundancy. Categorize controls based on asset type, environment, or custom categories.

Rapidly score your risk level for each control and get insights from risk quantification and analytics that are easy for anyone to understand and act on.

Set due dates for control actions, view workflow and approval status and assign users to varied access levels.

Intelligently Reduce Risk With Patented AI

AI generated compliance roadmaps weigh associated cost and impact variables, reduce overall risk for the lowest cost and highest impact.

Allow management to determine risk levels as measured against the NIST CSF and other frameworks.

Address control-level threats dynamically within any environment. CyberStrong's patented suggestion engine links live threat intelligence to controls in your gaps for granular prioritization.
