NIST & NICE Cybersecurity Training Curriculum & Student Management Platform

NIST & NICE Cybersecurity Certification Training Curriculum

Today, due to the ever changing threat landscape created by Digital Transformation (DX) programs (IoT, Mobile, Cloud etc.) and a very sophisticated network of threat actors (i.e., the bad guys) enterprises need to build a workforce capable of engineering, maintaining and improving the best practice frameworks and methodologies required to identify, protect, detect, respond and recover from cyber-attacks.

itSM Solutions NISTCSF.COM is a global consortium of academic, government and industry thought leaders working together to create Digital Transformation (DX) Training Curriculum and Platforms (DxCERTSSM) that teach the knowledge, skills and abilities to operationalize the IT and NIST Cybersecurity frameworks, methodologies and technologies created by the **National Institute of Standards and Technologies (NIST), Axelos, ISACA and other internationally recognized institutes and organizations.**

The consortium's focus is to create online training curriculum that can be delivered in an instructor led classroom, virtual classroom, blended classroom or as a standalone self-paced video program.

The consortium is also focused on delivering online train-the-trainer services that will enable academic and enterprise institutions to utilize existing resources to support the delivery or mentoring portion of its IT & NIST Cybersecurity workforce development and continuing education program.

NIST & NICE Cybersecurity Training Curriculum & Student Management Platform

The consortium's UMass Lowell NIST Cybersecurity Framework NCSF-CFM certification training programs were recently featured in the [National CyberWatch Center 2018 Innovations in Cybersecurity Education magazine](#).

DxCERTS NIST/NICE Cybersecurity Curriculum & Student Management Platform

DxCERTS is the industry's first online IT & NIST Cybersecurity career pathway training curriculum & student management platform designed specifically for K-12, higher education and enterprise learning & development organizations.

DxCERTS career pathway programs are aligned with the industry leading IT & Cybersecurity frameworks being adopted and operationalized by organizations across the globe. These frameworks include the NIST Cybersecurity Framework, NICE Cybersecurity Workforce Framework, ITIL, RESILIA, Cobit and the Digital Transformation Readiness Framework.

The online curriculum includes eight IT & NIST Cybersecurity career pathway programs plus one Business Soft Skill track which are designed to fit seamlessly into any existing academic or Learning & Development instructor-led or self-paced program.

NIST & NICE Cybersecurity Training Curriculum & Student Management Platform

DxCERTS Curriculum Benefits

Listed below are the eight reasons your university, training company or enterprise learning and development organization should partner with itSM Solutions for its DxCERTS IT & NIST Cybersecurity career pathway curriculum subscription program.

- DxCERTS is the industry's first online NIST & NICE Cybersecurity career pathway training curriculum & student management platform designed specifically for K-12, higher education and enterprise learning & development organizations.
- DxCERTS career pathway programs are aligned with the industry leading IT & Cybersecurity frameworks being adopted and operationalized by organizations across the globe. These frameworks include the NIST Cybersecurity Framework, NICE Cybersecurity Workforce Framework, ITIL, RESILIA, Cobit and the Digital Transformation Readiness Framework.
- DxCERTS flexible pricing program provides enterprises of any size the ability to offer training to all of its IT & NIST Cybersecurity workforce.
- DxCERTS flexible delivery options enable the program to be adapted to any organizational structure and training schedule
- DxCERTS online Student Monitoring, Mentoring & Reporting platform ensures a successful outcome for both the student and employer
- DxCERTS online instructor Train-the Trainer program provides enterprises and academic institutions with the tools to quickly stand-up its own delivery and mentoring force.

NIST & NICE Cybersecurity Training Curriculum & Student Management Platform

- DxCERTS multi-year licenses enable individuals and enterprises to span the training over degree program years or enterprise budget cycles
- DxCERTS procure options include Credit Card, Purchase Order, HR Continuing Education Funds, and State of Federal Workforce Development or Grant Funds

DxCERTS – NIST Cybersecurity Framework Certification Curriculum

This DxCERTS NIST Cybersecurity Framework (NIST-CSF) program teaches students how to Engineer & Operationalize a cybersecurity program based on the NIST Cybersecurity Framework.

The NIST Cybersecurity Framework (NIST CSF) training program was created in partnership with UMass Lowell (UML) a NSA/DHS National Center of Academic Excellence in Cyber Defense Research (CAE-R). The program was designed to train the engineering, operations and business teams responsible for operationalizing the framework controls (CIS 20 Critical Controls etc.) and management systems (ISO 27001 etc.) across an enterprise and its supply chain.

The UMass Lowell NIST Cybersecurity Framework – Controls Factory Model (NCSF-CFM) training program was created by Larry Wilson the CISO in the UMass president's office. The program was used to train the engineering, operations and business teams responsible for operationalizing the NIST Cybersecurity Framework Program controls (CIS 20 Critical Controls,

NIST & NICE Cybersecurity Training Curriculum & Student Management Platform

ISO27002, PCI, AICPA etc.) across the university five campuses and its supply chain. The NCSF-CFM program has since been used to train other universities, governments and private corporations to do the same.

The NCSF Control Factory™ model helps enterprises organize the Engineering, Operations and Business Risk of an NCSF program. The model is completely adaptable, which means that each of the modules can easily be updated, replaced or modified with minimal impact on the overall solution. Organizations are free to choose the minimum set of controls its need to improve its cybersecurity risk profile and then over time adopt additional controls that will take it to a higher cybersecurity state. The factory approach allows for changes in the cybersecurity threat landscape, new vulnerabilities and the addition of improvements while still keeping a focus on the critical assets and identities.

The program teaches the knowledge, skills and abilities to:

- Develop a strategy to educate executives and board members about the NIST Cybersecurity Framework (NCSF) and why they should allocate funding to launch and maintain a program
- Create a Cybersecurity Program that will become policy for an organization or industry association
- Engineer a solution to operationalize the cybersecurity program across an enterprise and its supply chain using the UMass Lowell NCSF Controls Factory™ Model (NCSF-CFM)

NIST & NICE Cybersecurity Training Curriculum & Student Management Platform

- Build and Operate a Security Operations Center (SOC) to continuously monitor and respond to changes in the cybersecurity profile documented in the cybersecurity program
- Conduct continuous Business Risk assessments to compare the current profile against the target profile (documented in the program) to identify any gaps that need to be addressed

NIST Cybersecurity Professional (NCSP) Awareness Training Curriculum

The DxCERTS NIST Cybersecurity Framework awareness training curriculum introduces students to the basic concepts associated with Digital Transformation, the NIST Cybersecurity Framework and Cybersecurity Risk Management.

NIST Cybersecurity Professional (NCSP) Foundation Certification Training

This APMG accredited training program is targeted at IT and Cybersecurity professionals looking to become certified on how to operationalize the NIST Cybersecurity Framework (NCSF) across an enterprise and its supply chain. The NCSF Foundation training course outlines current cybersecurity challenges and explains how organizations who implement a NCSF program can mitigate these challenges.

NIST & NICE Cybersecurity Training Curriculum & Student Management Platform

NIST Cybersecurity Professional (NCSP) Practitioner Certification Training

This APMG accredited training program is targeted at IT and Cybersecurity professionals looking to become certified on how to operationalize the NIST Cybersecurity Framework (NCSF) across an enterprise and its supply chain. The NCSF Practitioner program teaches the knowledge to prepare for the NCSF Practitioner exam plus the skills and abilities to design, build, test, manage and improve a cybersecurity program based on the NCSF.

NIST Cybersecurity Professional (NCSP) Boot Camp (Foundation + Practitioner) Certification Training

This APMG accredited training program is targeted at IT and Cybersecurity professionals looking to become certified on how to operationalize the NIST Cybersecurity Framework (NCSF) across an enterprise and its supply chain. The NCSF Bootcamp program teaches the knowledge to prepare for the NCSF Boot Camp exam (Foundation + Practitioner) plus the skills and abilities to design, build, test, manage and improve a cybersecurity program based on the NCSF.

DxCERTS – NIST & NICE Cybersecurity Frameworks Certification Training Library

This DxCERTS NIST Cybersecurity Framework (NIST-CSF) program teaches students how to Engineer & Operationalize a cybersecurity program based on the NIST Cybersecurity Framework plus the knowledge, skills and abilities to perform the Engineering, Operations and Specialist roles

NIST & NICE Cybersecurity Training Curriculum & Student Management Platform

(Auditor, Certified Ethical Hacker, RISK Manager etc.) associated with the NICE Cybersecurity Workforce Framework.

The DxCERTS curriculum is aligned with the industry leading IT & Cybersecurity frameworks being adopted and operationalized by organizations across the globe.

The online curriculum includes eight IT & NIST Cybersecurity career pathway programs plus one Business Soft Skill track which are designed to fit seamlessly into any existing academic or Learning & Development instructor-led or self-paced program.

NIST & NICE Frameworks Practitioner Subscription

This low cost, DxCERTS “All Access” subscription program provides students access to over 250 accredited training programs that will enable them to become certified in the most sought-after positions in IT & Cybersecurity including the NIST Cybersecurity Framework Foundation and Practitioner certification programs.

This easy to use training and management program not only helps organizations get the right training to the right person at the right time but also equips the management team (Professors, HR, Learning & Development, Department Managers etc.) with a student management and reporting platform that enables them to ensure a successful, on-time, training outcome for both the student, employer and academic institution.

NIST & NICE Cybersecurity Training Curriculum & Student Management Platform

DxCERTS Curriculum Consortium Partners

The following companies have come together to provide the operational infrastructure to support the DxCERTS curriculum consortium.

Reseller Partners

itSM Solutions has partnered with academic and private institutions to deliver the DxCERTS assessment and workforce development programs. Inaugural partners include New Horizons Computer Learning Centers, LRS Education Services, University of West Florida, Bryant University, GRC Sphere and Babbage Simmel.

Print and Digital Book Distribution

itSM Solutions has partnered with Arvato Training & Education Services a global eCommerce platform an integrated eReader application which delivers print and digital book versions of the DxCERTS curricula to students anywhere in the world. Arvato is currently the exclusive delivery partner for Microsoft training and consulting education solutions worldwide.

Platform Partners

itSM Solutions has partnered with leading Assessment, Learning Management and Simulation platform companies to deliver affordable training solutions for today's cyber enterprise. Inaugural partners include Career Academy and CyberSaint.

Authoring Partners

DxCERTS inaugural program NIST Cybersecurity Framework – Controls Factory Model™ (NCSF-CFM), was built in partnership with UMass Lowell

NIST & NICE Cybersecurity Training Curriculum & Student Management Platform

(UML) a NSA/DHS National Center of Academic Excellence in Cyber Defense Research (CAE-R). NISTCSF.COM has since formed strategic partnerships with Axelos creator of the ITIL®, RESILIA® and PRINCE2 frameworks & methodologies, ISACA creator of the COBIT framework, The Institute for Digital Transformation creator of the Digital Enterprise Readiness Framework (DERF) and other academic and private industry partners.

Publishing Partners

itSM Solutions is leading the development team to create assessment, remediation, certification and simulation training solutions for today's cyber enterprise

Accreditation Partners

itSM Solutions has partnered with APMG for content accreditation and exam delivery services.

Summary

Three things are certain: first, digital services are now at the center of most businesses; second, business is a moving target, third organizations are under attack from those trying to steal the information companies rely on for daily business operations and revenue.

The itSM Solutions DxCERTS training curriculum and student management system enables enterprises of any size to create a workforce capable of identifying, protecting, detecting, responding and recovering from cyber-attacks.

NIST & NICE Cybersecurity Training Curriculum & Student Management Platform

About itSM Solutions LLC

itSM Solutions LLC is an accredited content publishing company specializing in the creation of assessment, certification and skills training content for Information Technology (IT) and NIST Cybersecurity professionals. itSM's training solutions have been adopted by the who's who of industry including HPE, Microsoft, Disney, Cisco, IRS, Navy, Lowes, Staples, Genzyme, Boeing, Intel, Molina Healthcare and many others.

itSM Solutions is also the founder of NISTCSF.COM a global consortium of academic, government and industry thought leaders working together to create Cybersecurity training programs that help organizations operationalize, maintain and improve the frameworks and methods created by the National Institute of Standards & Technologies (NIST), the National Institute of Cybersecurity Education (NICE) and other internationally recognized institutes and standards organizations. The consortium's goal is to provide academia and enterprises with an affordable and scalable way to train, skill and certify today's Cybersecurity workforce.

About the Authors

David Nichols is the President and CEO of itSM Solutions LLC, an ITSM consulting and training company. He has over 40 years experience in Information Technology. As an early adopter of the IT Service Management processes as described in the IT Infrastructure Library (ITIL), he has utilized his hardware and software engineering background as a foundation for implementing sweeping changes in how IT Services are delivered at several fortune 100 companies in the US. Working closely with the executive management teams, David has helped the strategic goals of the IT organization with those of the company and develop a more effective IT Strategy. Strategies that are customer focused, process-oriented and cost/performance optimized, and help business and IT organization establish the value of IT Services. David holds ITSM Service Manager certification.

Rick Lemieux is a managing partner and the Vice President of Business Development. He is responsible for overseeing the company's Sales, Marketing & Business Development programs. Rick has been involved in selling IT solutions for the past 30 years. Prior to itSM, Rick, an early proponent of ITSM and ITIL, led the Sales and Business Development teams at software companies focused on automating the best practices guidance outlined in ITIL. Rick holds a Foundation Certificate in IT Service Management and was recently identified as one of the top 5 IT Entrepreneurs in the State of Rhode Island by the TECH 10 awards.
